Prof. J. Lederberg
Department of Genetics
University of Wisconsin
Madison, Wisconsin

Dear Dr. Lederberg:

I've been meaning to write since I received your letter, but only now seem to have some time. I would like merely to say 1) that I disagree with your evaluation of the situation, 2) that I admire your forthright statement of your point of view and 3) that we are looking forward to having you visit us this summer.

If I can be of any assistance in making your visit more pleasant or profitable please let me know.

Yours very truly,

David L. Nanney
